TECHNICAL DATA SHEET

HB-1128

STARFILM

Industrial Gear Lube

DESCRIPTION:

- Outstanding gear Tube specially formulated for the higher temperatures and pressures that are being found in today's industrial applications.

COMPOSITION:

- Premium quality mid-continent base stocks and wear preventing additives are being used in the blending of this excellent lubricant.
- Additives include anti-foaming agents, silicones, corrosion inhibitors, oxidation inhibitors, pour depressant, extreme pressure additives to provide a safe margin over and above the minimal requirements of normal service in heavy duty equipment operating under high stress conditions.

PERFORMANCE CHARACTERISTICS:

Meets or exceeds these important specifications:

Mil-L-2105
API Service Specifications GL2, GL3, GL4, CS3000A
U.S. Steel 200, 224
AGMA E.P. Specifications
CRC L-37 (high torque)
David Brown (United Kingdom)

USES:

- Highly recommended for industrial applications which are subjected to a wide range of temperatures and pressures.
- Recommended for in-plant, stationary or off-road applications.
- Available in AGMA E,P. Grades 1-8A, with the most popular grades being #5(SAE 90W), #8(SAE 140) and #8A(SAE 250).
