**TECHNICAL DATA SHEET**

# **HB-202**

## **Big Tex**

### **FLEET WASH**

#### **(Cars, Trucks & Buses)**

#### **DESCRIPTION:**

- Fast acting, deep red liquid detergent
- Rapidly penetrates and removes film, dirt and soils from cars, trucks and industrial equipment when used through high pressure cleaning equipment
- High concentration of special water conditioners allows economical dilution, extended soil suspension and a sparkling rinse, while protecting equipment from "liming" and scale buildup
- Safe to all hard surfaces not harmed by water
- Exhibits a pH at typical dilutions of approximately 10.5

#### **ADVANTAGES:**

- Economical - Provides rapid soil removal at extreme dilutions to cut chemical and labor costs
- Biodegradable and environmentally safe
- Rinses quickly and completely in hard or soft water, to leave surfaces sparkling clean

#### **DIRECTIONS FOR USE:**

When used in high pressure equipment with direct chemical injection, HB-202 is metered directly from its container at a ratio of 1:50 to 1:70 for most applications when the water hardness is moderate to high. In soft water, dilutions as great as 1:150 give complete soil removal

When used in equipment with a chemical concentrate tank, mix one gallon of HB-202 to every five gallons of water. This mixture is then metered between 1:10 and 1:30, depending on water conditions and the cleaning requirements

For manual washing, 3-6 ounces per gallon proves effective for medium to heavy soil loads

**SAFETY:**

Label use directions should be followed carefully. OSHA Material Safety Data Sheet available.

**PRECAUTIONS:**

Concentrated Big Tex may cause eye or skin irritations. Avoid prolonged or repeated contact with concentrate. In case of eye contact: Flush with large amounts of cool water and seek immediate medical attention. If swallowed: Give one or two glasses of water or milk. Call a physician immediately.

**FOR INDUSTRIAL OR INSTITUTIONAL USE ONLY!  
KEEP OUT OF THE REACH OF CHILDREN!**
