TECHNICAL DATA SHEET

HB-405P

Non-Flammable Polymer Chain Lube With Graphite

DESCRIPTION:

- A polymer-based compound developed specifically for the use in food plant ovens.
- Provides excellent adhesion, penetration and lubrication qualities.
- Forms a thin coating for superior anti-friction and anti-seizure properties, stops galling.
- Effective under extreme pressure and high temperatures.
- Dries to a non-tacky finish to resist rust and abrasive particles.
- Withstands water, oils, alkalis and most acids.
- Leaves a dry film lubricant to withstand extreme temperatures and give longer runs between lubrication intervals

PROPERTIES:

Form	Liquid
Color	Black
Storage Stability pH	Stir / Agitate before Use
Flash Point Temp	Non-Flammable

SAFETY:

Label use directions should be followed carefully. OSHA Material Safety Data Sheet available.

USES:

Specifically designed for use on food plant conveyer or ovens.

Application:

Apply directly to conveyor chains.

Works best if applied to cool or warm ovens and allowed to penetrate into the rollers. However, if unable to cool the ovens, apply as far away from the direct flame as possible.
