TECHNICAL DATA SHEET

HB-88

INDUSTRIAL STRENGTH SEWER PIPE CLEANER

DESCRIPTION:

- Powerful chemical compound made for Municipalities, Food Plants and Industry
- When activated by water, will generate heat, generate agitation, emulsify grease, emulsify oil, attack roots and digest paper.
- Provides deep penetration, is non-corroding, will attack hardened detergents and contains a highly visible tracing color

DIRECTIONS FOR USE:

- Shovel 20 to 25 pounds into strategic manholes and let this heavy duty, red colored chemical do the rest

FOR MUNICIPALITIES:

- Recommended application is about 25# shoveled or poured into strategic manholes
- Up to 50# may be used where necessary
- Needs water to do its work, if sewer system is dry, water should be poured down the manhole AFTER the compound is added

FOR INDUSTRY:

- Recommended for unstopping drains in food plants (particularly in packing houses where accumulations of organic matter tend to clog drainage systems)
- Product becomes activated by water, creating considerable heat and agitation
- Contains chemicals and metallic chips which will emulsify grease and oils and will digest paper and other materials containing a high percentage of cellulose.
- When added to strategic manholes, effectiveness of this product can be observed throughout the sewer pipe system at later intervals by observing traces of the color in other areas of the system

SAFETY:

Label use directions should be followed carefully, OSHA Material Safety Data Sheet available.

PRECAUTIONS:

Keep face away from fumes when mixing. Do not allow solution to touch skin or clothing

POISON: Contains Sodium Hydroxyde. Antidotes: Internal – Give vinegar or juice of lemon, orange, or grapefruit. Follow with Olive Oil. **EYES:** Flush and wash out with Boric Acid solution.

External: Flush with water, rinse with vinegar. Contact physician. Keep out of reach of children.
